Market Analysis — Prince George, BC

ERS QUOTE ERS-2026-005 | INFRASTRUCTURE BC — UHNBC EXPANSION

Scale: 1,000 construction workers | 48-month contract | \$105/person/night

1. LONG-TERM RENTAL MARKET — PRINCE GEORGE, BC

(Source: Zumper Prince George estimates, April 2026 — figures are estimates)

Unit Type	Monthly Range	Top-of-Market
1-Bedroom	\$1,450–\$1,700/month	\$1,700/month
2-Bedroom	\$1,850–\$2,200/month	\$2,200/month

Notes: Prince George is a smaller northern BC market with limited top-of-market supply. ERS underwriting assumptions of \$1,700/1-bed and \$2,200/2-bed are at the market ceiling — realistic for quality, well-located workforce housing units. Available supply at this tier is constrained; securing 500+ units at these rates would require significant pre-commitment and relationship with local landlords.

2. HOTEL MARKET — PRINCE GEORGE

Key properties and estimated nightly rates:

Property	Nightly Rate Range
Marriott Courtyard Prince George	\$180–\$220/night
Sandman Hotel Prince George	\$160–\$190/night
Ramada by Wyndham Prince George	\$140–\$170/night
Coast Inn of the North	\$150–\$185/night

- **Market range:** \$140–\$220/night
- **Monthly equivalent (avg \$175/night × 30):** ~\$5,250/person/month

Workforce Limitation: Hotels are not designed for long-stay workforce deployment. Key deficiencies:

- No cooking or food preparation facilities
- Limited personal storage
- No community or social space
- No laundry (or expensive on-property laundry)
- No service layer for workforce management
- Significant retention and morale impact for multi-year projects
- No ability to absorb 1,000 workers simultaneously — Prince George hotel inventory is insufficient

3. AIRBNB / SHORT-TERM RENTAL MARKET

- Prince George STR inventory is limited (~150–200 active listings estimated)
- Average nightly rate: \$120–\$160/night for units suitable for workforce use
- **Monthly equivalent:** ~\$3,600–\$4,800/person

Workforce Limitation:

- STR platforms actively restrict long-term workforce bookings (Airbnb ToS limits)
- No guaranteed availability at project scale — market too thin
- No bulk pricing or volume agreements
- No managed service layer or 24/7 support
- High turnover risk — hosts can cancel, reprice, or withdraw listings
- Not scalable to 1,000 workers

4. CORPORATE FURNISHED RENTALS

- Corporate furnished rental stock in Prince George is very limited
- Estimated: \$2,800–\$3,500/month for furnished 1-bedroom
- **No major corporate housing operators are active in Prince George**
- No meaningful inventory exists at 1,000-person scale
- Would require new supply development — no plug-in solution available

5. ERS VS. MARKET COMPARISON

Per person per month:

Option	Per Person/Month	Per Person/Night	Notes
Hotel (avg)	\$5,250	\$175	No cooking, no community, poor retention
Airbnb/STR	\$4,200	\$140	No guaranteed supply, no service layer
Corporate Furnished	\$3,200	\$107	No scale for 1,000 people
Long-term rental (self-managed)	\$2,100	\$70	No furniture, no service, admin burden per contractor
ERS Full Service	\$3,150	\$105	All-inclusive: furnished, managed, 24/7 support

Important Note: The self-managed long-term rental figure (\$70/night equivalent) represents raw rent only. It does not include:

- Furniture procurement (\$9,500/unit amortized over contract)
- Utilities (~\$200/unit/month)
- Admin and HR overhead for individual contractor housing management
- Guest services and on-call support
- Maintenance coordination

>

When fully loaded, self-managed costs exceed the ERS rate — without the service layer.

6. TOTAL COST COMPARISON — 1,000 WORKERS, 48 MONTHS

Option	Monthly (1,000 workers)	48-Month Total
Hotel	\$5,250,000	\$252,000,000
Airbnb/STR	\$4,200,000	\$201,600,000
ERS Full Service	\$3,150,000	\$151,200,000
ERS Savings vs. Hotel	\$2,100,000/mo	\$100,800,000
ERS Savings vs. STR	\$1,050,000/mo	\$50,400,000

ERS delivers \$100.8M in savings vs. hotel over the 48-month contract term.

7. RATE FLOOR / CEILING ANALYSIS

Scenario	Rate	Monthly Revenue	48-Mo Revenue
Floor (break-even)	~\$55/person/night	\$1,650,000	\$79,200,000
Recommended (current)	\$105/person/night	\$3,150,000	\$151,200,000
Premium	\$115/person/night	\$3,450,000	\$165,600,000
Market Ceiling (hotel)	\$175/person/night	\$5,250,000	\$252,000,000

ERS at \$105/person/night sits **40% below the hotel market average** while delivering a fully managed, full-service workforce housing product. Significant rate increase headroom exists — ERS could raise rates by 10–60% and still be cheaper than hotels.

8. MARKET OPPORTUNITY SUMMARY

Supply Constraints Create First-Mover Advantage:

- Prince George's hotel market cannot absorb 1,000 workers long-term — total capacity constraint
- STR market is too small and contractually unreliable for project-scale workforce deployment
- Corporate housing market is essentially non-existent at this scale in Prince George
- No comparable full-service workforce housing operator is active in Northern BC at this scale

Strategic Position:

- ERS has **first-mover advantage** in Northern BC workforce housing
- UHNBC expansion represents the **single largest workforce housing opportunity in Northern BC in a generation**
- Winning this contract establishes ERS as the **dominant workforce housing operator for the entire Northern BC construction and healthcare corridor**
- Creates a referenceable anchor contract for future bids across BC's resource and infrastructure sector

Competitive Moat:

- Competitors cannot spin up 1,000-unit managed workforce housing in Prince George quickly
- ERS operational model (pre-furnished, 24/7 managed, single-invoice) is purpose-built for exactly this client
- Margin structure at \$105/night allows room to negotiate and still maintain 40%+ gross margin

This market analysis was prepared in support of ERS Quote ERS-2026-005. Rental rate estimates sourced from Zumper Prince George data (April 2026). Hotel rates estimated from publicly available booking data. All figures are estimates and subject to change.
